Greetings FAWWA service area residents!

The developers of TimberRidge and Sterling Ranch are committed to sustainable living and have implemented several measures to conserve water including watering restrictions. If you have newly installed landscaping, you can request a watering variance permit to allow for additional watering during the initial grow season.

Your newly installed landscaping will need an establishment period to promote healthy root system growth. This establishment period is a one-time only, 45-day period following the date of completion of your landscaping.

Please let FAWWA know of your need for a watering variance permit by completing the form below so that we can document your approved watering variance. This form can be emailed to FAWWA at info@fawwa.net.
